

2. Write a C program to input two numbers through the keyboard and display its sum and average

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
int first, second, sum;
```

```
float average;
```

```
printf("Enter the first number: ");
```

```
scanf("%d", &first);
```

```
printf("Enter the second number: ");
```

```
scanf("%d", &second);
```

```
sum= first + second;
```

```
average = (first + second)/2;
```

```
printf("sum = %d\n",sum);
```

```
printf("average = %f\n", average);
```

```
}
```
