

3. Write a C program to display the results of addition subtraction multiplication and division of two numbers input it through keyboard

```
#include<stdio.h>

int main()
{
    int first, second, addition, subtraction, multiplication;
    float division, temp;

    printf("Enter the first number: ");
    scanf("%d", &first);

    printf("Enter the second number: ");
    scanf("%d", &second);

    addition = first + second;
    subtraction = first - second;
    multiplication = first * second;
    temp = first;
```

```
division = temp / second;
```

```
printf("addition = %d\n", addition);
```

```
printf("subtraction = %d\n", subtraction);
```

```
printf("multiplication = %d\n", multiplication);
```

```
printf("division = %f\n", division);
```

```
}
```
