

5. Write a C program to calculate the simple interest

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int simpleintarest, principlevalue, rate, time;
```

```
    printf("Enter the principle value: ");
```

```
    scanf("%d", & principlevalue);
```

```
    printf("Enter the rate: ");
```

```
    scanf("%d", & rate);
```

```
    printf("Enter the time: ");
```

```
    scanf("%d", & time);
```

```
    simpleintarest = (principlevalue * rate * time)/100;
```

```
    printf ("simpleintarest = %d\n", simpleintarest);
```

```
}
```
