

5. Write a program to enter a number and then calculate the sum of each digit

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    int num, sum, digit;
```

```
    printf("Enter a number: ");
```

```
    scanf("%d", &num);
```

```
    sum = 0;
```

```
    while (num > 0)
```

```
{  
    digit = num % 10;  
    sum = sum + digit;  
    num = num / 10;  
}  
  
printf("Sum of digits is: %d\n", sum);  
  
return 0;  
}
```
