

1. Write a C program to find the factorial value of any number using function. Function should take the number as argument and return the value

```
#include<stdio.h>
```

```
int factorial(int);
```

```
int main()
```

```
{
```

```
    int num, result;
```

```
    printf("Enter a number: ");
```

```
    scanf("%d", &num);
```

```
    result = factorial(num);
```

```
printf("Factorial of %d is %d\n", num, result);
```

```
return 0;
```

```
}
```

```
int factorial(int num)
```

```
{
```

```
int i, fact=1;
```

```
for(i=1; i<=num; i++)
```

```
{
```

```
fact = fact * i;
```

```
}
```

```
return fact;
```

```
}
```
