

5. Write a C program to calculate the area of a circle using function. Function should receive the radius as argument and return the area

```
#include<stdio.h>
```

```
float area(float);
```

```
int main()
```

```
{
```

```
    float radius, result;
```

```
    printf("Enter radius: ");
```

```
    scanf("%f", &radius);
```

```
    result = area(radius);
```

```
printf("Area of circle is %.2f\n", result);
```

```
return 0;
```

```
}
```

```
float area(float r)
```

```
{
```

```
    float a;
```

```
    a = 3.14 * r * r;
```

```
    return a;
```

```
}
```
